

In the Claims

Please cancel claims 1 and 2 and add claims 3-29 as indicated below.

1. (Canceled)

2. (Canceled)

3. (New) A system for providing a video file to a wireless telephone, the system comprising:

a remote computer with access to a database of video files suitable for downloading to the wireless telephone wherein the remote computer is configured to:

provide a list of video files in the database to a user of the wireless telephone when the user requests the list of video files;

allow the user of the wireless telephone to browse the list of video files;

allow the user of the wireless telephone to select a desired video file from the list of video files; and

allow the user of the wireless telephone to optionally download a selected video file into the wireless telephone for use as desired by the user of the wireless telephone;

wherein the system is configured to confirm the selected video file has been properly received by the wireless telephone.

4. (New) The system of claim 3 wherein the remote computer is further configured to allow the user of the wireless telephone to search the database of video files for a certain video file using title or description information.

5. (New) The system of claim 3 further configured to allow the user of the wireless telephone to review the selected video file before downloading the selected video file into a programmable memory in the wireless telephone.

6. (New) The system of claim 5 further configured to provide the user of the wireless telephone with the option of downloading the selected video file into a programmable memory in the wireless telephone after reviewing the selected video file.

7. (New) The system of claim 6 further configured to provide the user of the wireless telephone with the option of editing the selected video file before programming the selected video file into the programmable memory in the wireless telephone.

8. (New) The system of claim 3 wherein the remote computer is further configured to provide a plurality of lists of video files for browsing by the user of the wireless telephone.

9. (New) The system of claim 3 wherein the database is configured to include video files in a format selected from the group comprising MPEG, JPEG, AVI, or DVD format.

10. (New) The system of claim 3 configured to provide copyright protection for the database of video files to help prevent unauthorized distribution of video files downloaded by the user of the wireless telephone.

11. (New) The system of claim 3 further configured to coordinate downloading of the selected video file such that the user of the wireless telephone is informed when the wireless telephone has insufficient available memory capacity to successfully download the selected video file.

12. (New) A method for providing a video file to a wireless telephone, the method comprising:

providing a database of video files suitable for downloading to the wireless telephone;

providing a list of video files in the database to a user of the wireless telephone when the user requests the list of video files;

allowing the user of the wireless telephone to browse the list of video files;

allowing the user of the wireless telephone to select a desired video file from the list of video files;

allowing the user of the wireless telephone to

optionally download a selected video file into the wireless telephone for use as desired by the user of the wireless telephone; and

confirming the selected video file has been properly received by the wireless telephone.

13. (New) The method of claim 12 further comprising allowing the user of the wireless telephone to search the database of video files for a certain video file using title or description information.

14. (New) The method of claim 12 further comprising allowing the user of the wireless telephone to review the selected video file before downloading the selected video file into a programmable memory in the wireless telephone.

15. (New) The method of claim 14 further comprising providing the user of the wireless telephone with the option of downloading the selected video file into a programmable memory in the wireless telephone after reviewing the selected video file.

16. (New) The method of claim 15 further comprising providing the user of the wireless telephone with the option of editing the selected video file before programming the selected video file into the programmable memory in the wireless telephone.

17. (New) The method of claim 12 further comprising providing a plurality of lists of video files for browsing by the user of the wireless telephone.

18. (New) The method of claim 12 further comprising storing video files in the database in a format selected from the group comprising MPEG, JPEG, AVI, or DVD format.

19. (New) The method of claim 12 further comprising providing copyright protection for the database of video files to help prevent unauthorized distribution of video files downloaded by the user of the wireless telephone.

20. (New) The method of claim 12 further comprising coordinating downloading of the selected video file such that the user of the wireless telephone is informed when the wireless telephone has insufficient available memory capacity to successfully download the selected video file.

21. (New) An Internet site that allows a user of a wireless telephone to browse and select a video file that may be downloaded into a wireless telephone, the Internet site comprising:

a database of video files suitable for downloading to the wireless telephone wherein the Internet site is configured to:

provide a list of video files in the database to the user of the wireless telephone when the user of the wireless telephone requests the list of video files;

allow the user of the wireless telephone to browse the list of video files;

allow the user of the wireless telephone to select a desired video file from the list of video files; and

allow the user of the wireless telephone to optionally download a selected video file into the wireless telephone for use as desired by the user of the wireless telephone.

22. (New) The Internet site of claim 21 configured to operate in conjunction with a distribution computer to confirm the selected video file has been properly received by the wireless telephone.

23. (New) The Internet site of claim 21 further configured to allow the user of the wireless telephone to search the database of video files for a certain video file using title or description information.

24. (New) The Internet site of claim 21 further configured to operate in conjunction with a distribution computer to allow the user of the wireless telephone to review the selected video file before downloading the selected video file into a programmable memory in the wireless telephone.

25. (New) The Internet site of claim 24 further configured to operate in conjunction with a distribution computer to provide the user of the wireless telephone with the option of downloading the selected video file into a programmable memory in the wireless telephone after reviewing the selected video file.

26. (New) The Internet site of claim 21 further configured to provide a plurality of lists of video files for browsing by the user of the wireless telephone.

27. (New) The Internet site of claim 21 wherein the database is configured to include video files in the format selected from the group comprising MPEG, JPEG, AVI, or DVD format.

28. (New) The Internet site of claim 21 configured to operate in conjunction with a distribution computer to provide copyright protection for the database of video files to help prevent unauthorized distribution of video files downloaded by the user of the wireless telephone.

29. (New) The Internet site of claim 21 configured to operate in conjunction with a distribution computer to coordinate downloading of the selected video file such that the user of the wireless telephone is informed when the

wireless telephone has insufficient available memory capacity
to successfully download the selected video file.
